

Longleaf Tee System

Moving the game forward for all players

▲ PLAY STARTS AT LONGLEAF WITH A CHALLENGE TO THE GOLFER

"The **Longleaf Tee System** makes every round more fun, every course more playable, and allows the facility to be more successful."

Bill Bergin

Longleaf Architect/American Society of Golf Course Architects

PROVIDING AN ANSWER TO GOLF'S GREATEST NEED

In its current form, golf is struggling to grow. Most courses are simply too hard and unwelcoming for those who aren't the more highly skilled players. The holes are too long, the pressure to play at a proper pace is too great, and the emphasis on scoring lower can be too formidable. Without creating multiple types of golf courses specifically designed for every kind of player, the game caters to a limited market.

But what if there was a way to recreate that same expectation for every type of player? A way for each golfer to share the same golf experience, play at comparable speeds and feel welcome and appreciated?

Introducing the **Longleaf Tee System**.

WORKING TOGETHER

The **Longleaf Tee System** is a joint initiative of the **American Society of Golf Course Architects** and the **U.S. Kids Golf Foundation**. Our mission is to offer golf course owners and operators a practical, affordable way to adjust the length of their course in a manner that will enable more players to enjoy playing golf while keeping the design, integrity and challenge of the layout intact.

"This is no longer theory, it is **proven data**. We know firsthand through our experience as an owner that scaling our course with seven sets of tees on each hole makes golf **more enjoyable** for all players and **more profitable**. The results were immediate and they were profound!"

Dan Van Horn

Owner, Longleaf Golf & Family Club

President, U.S. Kids Golf Foundation

THE CHALLENGE AS IT EXISTS TODAY

The USGA® defines a *female bogey golfer* as a player with a Course Handicap of 24 and can hit drives 150 yards (total yardage), while able to reach a 280-yard hole in two shots. That is the **maximum yardage** for a par 4 under those parameters; holes requiring approach shots with irons should measure significantly less. Furthermore, the implication is that holes longer than 280 yards will require at least one additional shot to reach the green.

So how many par 4s at your course measure longer than 280 yards from the most forward tees? **In essence, we're asking the female bogey golfer to play mostly par 5s.** And then we demand they keep a proper pace-of-play.

Using the correlation of distance between a driver and every other club in the bag, we will show that the female bogey golfer should **play a course measuring approximately 3800 yards.** A quick Google search of scorecards reveal zero courses that do so. In fact, virtually all courses have a most forward tee yardage between 4800-to-5600 yards. Is it any wonder a significant portion of golfers do not feel welcome on the course? We have set these players up for failure.

This same argument could apply to youth, to seniors, to beginners, and many other occasional players. Golf is simply not providing a proper path to welcome them. **Until now.**

Scaling the course for success

Scaling a course means providing a fair and enjoyable test for every player on every hole. The most common misconception is that tee placements should allow for players to hit from similar distances after a drive. In fact, proper scaling means players will have similar tests on their approach, meaning a hole's design that calls for a driver/7-iron for the most skilled players will also call for a driver/7-iron for the beginners and less-skilled amateurs.

The Driver Carry Distance Formula

Years of study, validated by **Trackman®** measurements of all levels of players, show that there is a direct correlation between the distance a player can hit their driver (carry) and the other clubs in their bag. From Tour players to the avid club players, the percentages are remarkably consistent. The chart below illustrates the relationship between the distance of every club to the player's driver distance.

	BLUE 1	GOLD 2	GREEN 3	ORANGE 4	WHITE 5	PURPLE 6	RED 7	PGA TOUR
DRIVER CARRY DISTANCE	100	125	150	175	200	225	250	275

LPGA Tour Driver Carry Distance Avg. - 218 yards

PGA Tour Driver Carry Distance Avg. - 275 yards

Club	% of Driver	Carry Distance	Roll	Carry Distance	Roll	Carry Distance	Roll	Carry Distance	Roll	Carry Distance	Roll	Carry Distance	Roll	Carry Distance	Roll	Carry Distance	Roll

Example 9-hole yardage with a 2-5-2 course setup

Below is an example of a typical 9-hole layout offering **two par 3s**, **five par 4s**, and **two par 5s**. It shows the corresponding yardages of how each hole would play based on the Longleaf Tee System. This example would test virtually every club in the bag while preserving the integrity of the design. Even more, this layout provides more fun and scoring opportunities for players while allowing for faster play for everyone.

			BLUE 1	GOLD 2	GREEN 3	ORANGE 4	WHITE 5	PURPLE 6	RED 7	PGA TOUR
DRIVER CARRY DISTANCE			100	125	150	175	200	225	250	275

18-HOLE YARDAGE			3130	3786	4386	5040	5618	6276	6830	7482
9 HOLE GAP				328	300	327	289	329	277	
18 HOLE GAP				656	600	654	578	658	554	

▲ IN ORDER FOR A 9-HOLE LAYOUT TO RECEIVE AN OFFICIAL USGA SLOPE/RATING, THE TOTAL MINIMUM YARDAGE MUST BE 1500 YARDS AND HAVE AT LEAST ONE HOLE MEASURING AT LEAST 250 YARDS.

GETTING PLAYERS STARTED

Forget word or color associations for tees

The **Longleaf Tee System** is simple and practical, yet very profound. It eliminates outdated norms and vernacular, such as **men's tees**, **ladies' tees**, **senior tees**, or color associations like **white**, **red**, or **blue**; there are now simply multiple tees locations to begin each hole at a yardage based on how far any person hits their drive. As a player develops their game, the further back they play. As the player get older and their distance begins to diminish, the player moves up.

Which tees should I play from?

Beginning with 100 yards, numbered poles are located on the range—ascending from 1 to 8. Players hit a number of drives, matching their average carry distance to the most closely associated number pole. The player now has the suggested tee location number optimal for their round.

▲ DISTINCT SIGNAGE ON THE LONGLEAF RANGE GUIDE PLAYERS TO DETERMINE WHICH TEES TO PLAY BASED ON A SIMPLE PREMISE: HIT A FEW DRIVES, SEE WHERE YOUR BALL LANDS, AND PLAY THE CORRESPONDING TEE.

SIMPLIFY YOUR SCORECARD AND PROVIDE BLENDED TEE LOCATIONS

A groundbreaking scorecard layout based on the Longleaf Tee System

- ➔ Shows all seven tee options including blended tees, providing six additional tee options. Thirteen total tee locations are available for players to use.
- ➔ All tee locations are rated for USGA slope & ratings (for both men and women) which allow our youth to develop a handicap at an early age. NOTE: to be rated the USGA requires a minimum of 1500 yards for each 9 holes with one hole being at least 250 yards or longer.
- ➔ Each hole has the same handicap value for both male and female play.
- ➔ A unique, and important design feature of the card is to present the shortest distance first and not last.
- ➔ One scorecard is used for all play.

1.5 Play our blended tees to create a new experience each visit. Use the arrows to select the correct tee during the round. ▼▲

THE IMPACT ON YOUR FACILITY

Improved success for golf facilities, player recruitment/retention and golfer satisfaction are within reach.

What Does It Cost To Add New Tees?

Tee construction can be accomplished for a modest cost relative to the general range of capital improvement options available to the golf facility. Factoring in variables such as tee size, irrigation upgrades, topography and amount of grading required, grass types, use of sod, sprigs or seed, etc., the typical course should be able to install tees, ranging in size from six to eight hundred square feet, for under \$4.00 per square foot.

What Is Your Return On Investment?

The immediate benefit is there will be more rounds played by your current clientele providing you with more cart rentals and F&B. There will be a better pace of play. New players of all ages and gender will have success and enjoy the game!
